

AMENDMENTS TO THE SPECIFICATION

Please insert the following paragraph beginning on page 1, line 3:

-- RELATED APPLICATIONS

This application is a 371 National Phase of PCT Application No. PCT/JP2003/006044, filed 15 May 2003, which claims priority to Japanese Application Nos. JP 2002-140776, filed 15 May 2002 and JP 2003-097346, filed 31 March 2003. Each of these applications is herein incorporated in its entirety by reference. --

Please insert the following paragraph beginning on page 14, line 7:

-- Figure 7 is a block diagram illustrating a detail of the polyolefin layers on both sides of a core layer configured according to one embodiment of the present invention.--

Please replace the paragraph beginning at page 28, line 16 with the following rewritten paragraph:

-- A multiple bag for filling and closing a bag-making, in which a tubular is structured in a flat shape such that two opposing films form an inner film and an outer film, a back lining seal portion is structured by welding a portion near both sides of the end edges in which the inner film and the outer film are connected, and a lateral seal 30 portion is structured by welding a portion near both sides of the end edges in which the inner film and the outer film are not connected, wherein the tubular film is constituted by a tubular co-extrusion inflation film having a polyolefin layer 32 in both sides of a core layer 34 as illustrated in Fig. 7.--
